

theLine®

CATALOGUE 2021

Designing memories

Since 2015, The Line crafts with care wall mountings in the spirit of poetic silhouettes.

In one stroke, cut out in metal, The Line reveals panorama of cities, legendary mountain tops, or even mythical music tracks visually represented by their soundwaves.

Through a pure and moving design, each one of us can recognise part of their own story, a memorable experience, a dream to achieve.

The Line strongly values the craftsmanship of its products - designed and made in half a dozen workshops across France - as well as the people behind the making, from the SCOP (equivalent to a Cooperative and Participatory organisation) where the metal shapes are cut out, to the assembling of the products done in an ESAT workshop (employing disabled persons with a view to professional reintegration) in the heart of Paris.

City

Silhouettes for city lovers

With its City collection, The Line is inventing a new way of talking about cities. While details and scales are always strictly accurate, we offer more than just a representation of London, Paris or New York; it's more of a new perspective, an editorial stance made up of choices, interpretations, accidents and happy movements.

The Line's team travels around the world and photographs city skylines, looking for viewpoints which are as beautiful as they are authentic. Then, it's up to you to imagine your own adventures...!

Music

Soundwaves for music lovers

Whether it's Billie Jean, Let it be or Wonderwall, we all have memories attached to these universal tunes. Some songs leave their mark forever. The Line has created its ultimate playlist, grouping together songs that have marked history and, using a unique algorithm, has converted them into elegant visual waves. Sound becomes a line and the song's highlights – its pauses and changes in tempo – become visible.

With this innovation, The Line created a modern take on music: it can now be viewed, mounted on walls, brushed up against, touched. Highly poetic, this collection embodies sound, as much as our emotions.

TheLine has launched a collaboration TheLine x Elysée and the National Guard orchestra, to represent France's national anthem in a unique, contemporary way. The notes and words written by Rouget de Lisle are materialized in a wall-mount sculpture that is both elegant and catchy. Revolutionary!

Summit

Silhouettes for mountain lovers

Everest, Mount Fuji or Table Mountain in South Africa - The Line Summit collection has been tackling legendary mountains since January 2020. The materialization of these rocky peaks – true wonders of the world – is designed for thrill seekers always looking for their next adventure, just as much as nature lovers and meditation aficionados. Those gigantic masses of stone are witnesses to our planet's history and symbols of its strength and fragility. They have common values and tickle the heavens as well as our deepest emotions.

Whether you have climbed Kilimanjaro, holidayed by Mont Blanc or dreamed of Everest for as long as you can remember, these silhouettes arouse both memories and raw emotions.
