30-Day Challenge[®]

This series of 30-day challenges will help you improve your wellness and reach important goals while enjoying more than ever your everyday life through amazing activities.

30-Day Challenge

How does it work?

This series of 30-day challenges are tickets boxes that invite you to live experiences throughout 30 days in order to reach a goal. You pull a ticket every day to discover an activity. To complete this little treat to yourself, you will need to find some quality "me time" in your busy schedule, to pause for a moment and live a meaningful and valuable experience. Committing to a 30-day challenge has plenty of benefits, and provides the boost you may need to get started making a change. Once started, the daily focus boosts momentum to implement the desired change consistently. As you keep going, achieving small successes can help motivate you to keep going. Enjoy your month!

The power of repetition

A habit is a learned automatic response. Forming new healthy habits—or breaking bad ones—involves multiple steps including making a decision to change, initiating the new behavior, and repeating it often. It is only through regular practice that you will be able to adopt new ways of approaching life, reset your mindset and feel good. This series of 30-day challenges will propose different actions every day, all of them focused on training your brain towards the same goal. This practice will help you get the ball rolling in order to transform your life.

On each ticket you will find an action to complete on the front and some extra informative content on the back. The backside information will explain to you the benefits of the activity and will give you tips on how to complete it. We recommend doing your 30-day challenge daily, consistently during one month to get better results; however, it is also okay if you do it whenever you can. Either way, practice it mindfully and think of your goal before starting each experience.

Travel

You are obsessed with *Wanderlust* but fulfilling your dream travels sounds a bit difficult and overwhelming? Having at your disposal the right tools to plan it no matter what time, savings or experience you have, can make all the difference. This 30-Day Travel Challenge proposes a series of daily hacks throughout 30 days to help you make your dream travels happen. Each ticket includes an action on the front side with additional benefits and information of each action on the back side.

Puzzles

This series of 1000-piece puzzles is a collection focused on important topics. It will invite you to quiet your mind and body, practice mindfulness, while submerging into a beautiful scene.

Puzzles

How does it work?

The 1000-Piece Puzzles are a collection of jumbo jigsaw puzzles focused on important topics related to our mental wellness and approach to society. They are an invitation to quiet your mind and boost your self-esteem. Doing a puzzle has plenty of benefits for your mental health; among them we can highlight three main ones. First, it is an amazing occasion to practice mindfulness and learn how to be present, more concentrated and less stressed. Second, it helps you work on the management of different kinds of emotions such as frustration, sense of overcoming, etc. Third, the simple act of finding the right piece, especially the last one, activates in your brain a reward system, which helps release dopamine, fostering a feeling of pleasure.

The power of now

As Eckhart Tolle writes in his famous book, *The Power of Now* "the present moment is all you have. Make the NOW the primary focus of your life (...) the past (...) and the future (...) are illusions". In this digital age more than ever, we need to make conscious efforts to get away from technology and learn to live in the here and now to be peaceful, connected, and happy. Puzzles are the perfect way to practice mindfulness and engage in the present moment. They help us reach a status of flow in which our relaxation response turns on and stress responses turn off.

Each piece you add to the puzzle will echo a thought, an emotion and feeling. Completing a puzzle is a lively process. You will go through up and downs, just as you do in real life; but will do so with a quiet and mindful mindset, which is how we should approach our daily life. Additionally, the scenes you will slowly discover hold a message, and will wrap you into a reflection about important topics that we should dedicate time to, in order to feel better.

Happiness

In this puzzle, you are invited to reflect about happiness and how important it is to enjoy every simple moment of your daily life, with joy and enthusiasm. It's all about your beliefs towards your life and the way you look at things. If you approach life with a happy smile, your thoughts and experiences will follow. While working on this the puzzle, focus on the bright side and enjoy the process.

LGBTQ+

You are invited to reflect about the daily battles that the LGBTQ+ community are facing and question your own identity. It is of crucial importance to navigate the world with knowledge, and take time to reflect about our behavior towards inclusivity and the approach of our society and politics towards gender identity, etc. While working on this the puzzle, you will have the space to reflect and hopefully take action in support of a more fair world.

Flowers

Flowers can chase away anxieties, worries and the blues, making you feel less depressed, troubled, or agitated. They can induce a more positive outlook on life, boosting energy and happiness. Whenever we see or receive some pretty flowers our brain instantly recognizes that as a good, rewarding thing and releases several chemicals like dopamine, oxytocin and serotonin known as the 'happy' chemicals. In this puzzle you will constantly see flowers and be able to enjoy this mindful moment while energizing your body and mind.

Body Positivity

You are given the opportunity to slow down and reflect about the beauty of diversity and work on your acceptance towards your own body and those of others. With the pressure of social media and the invasion of photoshopped images around us, we may forget that every body is beautiful, and we may feel pressured to reach a particular "beauty standard". This is not real. True beauty lies in our uniqueness.
